

Education

Engineering Degree in Applied Computer Science <i>National School of Engineers of Sousse (ENISO)</i> Ranked 3 rd out of 53 students in the first year	2024 – Present
Preparatory Cycle for Engineering Studies <i>Preparatory Institute for Engineering Studies of Monastir (IPEIM)</i>	2022 – 2024
Baccalaureate in Mathematics <i>Fattouma Bourguiba High School, Monastir, Tunisia</i>	2019 – 2022

Technical Skills

AI & Machine Learning	LLMs, RAG, TensorFlow, PyTorch, LangChain
Automation	n8n
Programming Languages	Python, Java, C, C#, JavaScript, Dart, Shell Scripting
Web Development	HTML, CSS, JavaScript, Node.js, ASP.NET
Mobile Development	Flutter
Databases	MongoDB, PostgreSQL

Academic Projects

Malicious Intent Detection - Designed an NLP message classification system (spam, phishing, attack) with text cleaning and keyword extraction - Built an n8n automation pipeline for alert processing and response action orchestration - Developed a browser extension for real-time URL analysis and automatic classification
Pick and Place Robot Simulation - Simulated a vision-guided robotic arm using YOLO for real-time object detection in Webots - Programmed control logic in Python for precise pick and place operations
Intelligent Virtual Desktop Assistant - Built a voice assistant with a Tkinter interface integrating web search, weather, and task automation - Implemented natural language processing for voice command recognition in Python
Virtual Wardrobe Web App Developed a full-stack wardrobe management application with authentication and CRUD operations

Internship

Software Development Intern – TANIT Company Developed a mobile fleet management application using Flutter and Dart.	July 1 – September 1, 2025
---	----------------------------

Responsibilities

Treasurer – ENISO CyberGuards Cybersecurity Club	2026 – 2027
- Managed financial operations, budget allocation, and club financial record-keeping - Organized and coordinated cybersecurity workshops, CTF competitions, and awareness campaigns	

Certifications

LLM Applications With Prompt Engineering – NVIDIA Prompt engineering techniques, LLM optimization, NLP applications	March 2026
Data Parallelism: How to Train Deep Learning Models on Multiple GPUs – NVIDIA Data parallelism, distributed training, GPU optimization	December 2025
Applications of AI for Predictive Maintenance – NVIDIA AI-driven predictive maintenance, real-time data analysis	December 2025

Languages

Arabic: Native	French: C1 (TCF)	English: Fluent
